

CAG New Techstack

Changing the UI and rebuilding the application rather than doing a direct CakePHP-to-Laravel conversion.

Recommended architecture

Tips

- Freeze the existing functionality
- Keep the existing database initially
- Rebuild the UI separately

Frontend

- Next.js
- React
- TypeScript

Backend

- Laravel
- REST APIs
- Authentication
- CMS/Admin
- Business logic
- Validation
- Role/permission management

Database

- PostgreSQL

Assets

- S3
- CloudFront CDN

Phase	Duration
Architecture + DB/API design	5 days
Laravel Headless setup + authentication	3 days
CMS/Admin development	15 days
new UI	5-6 days
API integration	5–7 days
S3 + CloudFront integration	3–5 days
Data migration	3–5 days
QA + functional testing	

	38 - 42 days
